

Research to protect, treat and cure animals.

High School Senior Proves Exposure to Horses Reduces Stress

MAF Honors Three Students at Science Fair

Three Colorado high school students took animal health into their own hands when one senior launched a science project to look at how horses reduce stress in humans, and two other students tested a new treatment for bone cancer in dogs. The three students won awards from [Morris Animal Foundation](#) (MAF) for the projects they presented at the Colorado State Science and Engineering Fair. [Read more](#) about their successful results.

Prevent and Treat Arthritis

Arthritis affects thousands of pets each year. Learn how to prevent and treat this disease in our [Arthritis Web Exclusive](#).

MAF Addresses Unwanted Horse Issue

Whether horses are considered companion animals or high-performance athletes, the one constant is that too many horses become unwanted. MAF takes a lead role in solving this problem. [Learn more](#).

MAF Helps Shelters Help Cats

A generous cat lover will match all gifts to our new Helping Shelters Help Cats research. [Learn more about this research](#) and

how to prevent and treat upper respiratory infection in your cat.

Celebrating Animal Health Successes

An MAF-funded researcher has developed a noninvasive method to detect heart failure in dogs. [Learn more](#) about this study and other successes for animals.
