

## **Signs of Heart Disease in Dogs**

- Restlessness
- Fainting
- A bluish tongue
- Loss of appetite
- Coughing
- Fatigue
- Body swelling
- Rapid or very slow heartbeat

## **Signs of Heart Disease in Cats**

Heart disease is more difficult to diagnose in cats than dogs because cats show few if any physical signs until the disease has significantly advanced.

- Exercise intolerance/fatigue
- Change in activity level
- Behavioral changes
- Heart murmur (detected by physical exam)
- Loss of appetite
- Labored breathing (needs immediate veterinary care)
